

QUALITY AND PRIDE...

The Salem Contractors Association is a group of business and professional trades people who organized in 1965 for the purpose of improving communications and the relationship between themselves and the consuming public. The membership represents every facet

of the construction industry and its associated services.

Initially, the Salem Contractors Association concerned themselves with improving the public's image of contractors in general. A standard was developed for membership that requires the business to demonstrate a high level of professionalism, offering craftsmanship and quality in whatever services they provide.

A Salem Contractors Association Liaison meets regularly with area Town

Inspection Teams to review changes to zoning ordinances and building codes. Close communication between professional tradesmen and public officials have eliminated many problems before they arise.

Today, the organization is one of the Salem area's most respected groups. Their active participation in community programs, service and government affairs as well as fostering the value of family and fellowship has earned them the praise and support of public officials, citizens, and customers alike.

Membership in the Salem Contractors Association provides such benefits as:

- Member & Community Identity
- Promotion of your Business
- Professional Development
- Personal Growth
- Financial Gains
- Community Service.
